Prescription Identification

www.drugs.com This has been the most reliable website in my experience identifying prescription and OTC medication.

[Poison Control Hotline](https://www.poisoncontrol.gov/): 1-800-222-1222 – use this number to identify medication. They are staffed 24/7, give a description of the medication and in seconds they will tell you what it is.

www.dancesafe.org, www.erowid.org, both have examples of what ecstasy/MDMA/psychedelic tablets look like, or a general internet search for “ecstasy tablets” will also give you a general idea.

<https://www.youtube.com/watch?v=-dXAZrZzYZ4> Handheld tablet press that can be used to make illicit tablets – ecstasy, illicit fentanyl/designer opiates, etc.
